

Best early-stage researcher papers published in *Psihologija* in 2022

Editor-in-chief of Psihologija prof. dr Vladimir Hedrih

Annual award for exceptional papers of early-stage researcher

In 2015, the editorial board of Psihologija introduced an award for the best early-stage researcher paper published in the journal in the previous year. The aim of this award was to encourage and support work and careers of young researchers in the area of psychology and neighboring disciplines.

Given that all papers published in *Psihologija* are open access, this is a good opportunity for their work to be widely accessible and cited. For 2022, two papers have been evaluated as those fulfilling high quality demands of our journal and scientific publishing and their first authors have been chosen for this award by the editorial board.

The authors are:

- **Siyi Liu** from the Key Laboratory of Brain, Cognition and Education Sciences, Ministry of Education, China; School of Psychology, Center of Studies of Psychological Application, and Guangdong Key Laboratory of Mental Health and Cognitive Science, South China Normal University, China

Who has been chosen for this award for the paper:

- Liu, S., Lu, A., Tian, H., Cai, Y., Zhang, M., Song, T., ... Qu, D. (2022). Event-related Potentials Reveal Early Visual-tactile Integration in the Deaf. *Psihologija*, 55(3), 329–355. <https://doi.org/10.2298/PSI210407003L>

And:

- **Masoumeh Hoshyari** from the Shahid Chamran University of Ahvaz, Ahvaz, Iran

Who has been chosen for this award for the paper:

- Hoshyari, M., Saemi, E., & Doustan, M. (2022). Motor Learning and Working Memory in Children: The Role of Cognitive-Motor and Motor-Motor Dual-Task Training. *Psihologija*, 55(4), 397–413. <https://doi.org/10.2298/PSI211002008H>

The editorial board of *Psihologija* congratulates the awarded authors and encourages junior colleagues and young researchers to submit their work to our journal.
